

THE COLONY CLUB OF SOUTHAMPTON SHORES, INC.

* * *

January 26, 1958.

Dear Colony Club Member:

At a Colony Club meeting held on October 5, 1957, we voted to appoint the Little Peconic Yacht Club the boating Committee for Southampton Shores.

At a meeting held the same day, Mr. Guy Barbolini was elected Commodore of this Yacht Club and the new yacht club group will be composed of residents of Southampton Shores only, and it's purpose will be to promote better boating facilities in Wooleys Pond and our other water ways.

This month, the Town Trustees of Southampton approved the Little Peconic Yacht Club as boating committee to work with the Town Bay official and allot anchorages in Wooleys Pond.

Much work will have to go into this planning and we need information very quickly so the committee can plan properly.

Every boat will need an official Town permit this year and if you have had a permit in the past, the Town informs us that all permits are for one year duration only. They must be renewed annually. There is no charge.

We immediately need a description, size, type and make of your boats and your anchorage location preference. Please put this information on the enclosed post card. If you anchor one boat out on the water and have another boat tied to shore, please give us this information. You must have a permit for the row boat too, if it is kept below the high water mark. Please state where you placed your boats last year.

It will be a great help to me if you will return this post card immediately so your official town application can be included in the annual Colony Club letter which will soon be ready for mailing.

Might I add that we are fortunate in having such a wonderful committee and your boating program is in very fine hands.

Sincerely yours,

Warner H. Emerson
